Career Objective

As a motivated and detail-oriented BCA graduate with a strong foundation in Python, Django, React, and full-stack web development, I am seeking an entry-level opportunity as a Software Developer / Full Stack Python Developer. Skilled in building responsive and user-friendly applications using modern technologies like HTML, CSS, JavaScript, Bootstrap, and SQLite, I aim to contribute my technical skills and problem-solving abilities to develop innovative solutions while continuously learning and growing in a dynamic software development environment.

Skills

- **Programming Languages:** Python, C, JavaScript
- **Front-End Development:** HTML, CSS, Bootstrap, React JS
- **Back-End Development:** Django
- **Database Management:** SQLite
- **Tools & Concepts:** Git/GitHub, VS Code, Object-Oriented Programming, Problem Solving

Projects

- **STUDENT STUDY PORTAL**
Designed and developed a Django-based web application to help students manage their studies effectively. Integrated features such as notes management, homework status tracking, to-do list, YouTube/book search, dictionary, Wikipedia search, and unit converters. Implemented user authentication for registration, login, and logout.
[GitHub](#) | [LiveDemo](#)
- **EMPLOYEE MANAGEMENT SYSTEM (CRUD)**
Developed a Python and SQLite-based application to manage employee information. Implemented functionalities to add, delete, filter, and view all employee records, providing an easy-to-use interface for efficient data handling.
[GitHub](#)
- **BREW & BANTER CAFÉ (Skill development project)**
Developed a responsive static website for a café using HTML and CSS. Designed pages to display menu, offers, and café details with a clean layout and user-friendly navigation. Focused on building responsive design principles to ensure accessibility across devices.
